

Eco-Oryx Solutions Limited

for all your itech-Solutions

Company profile

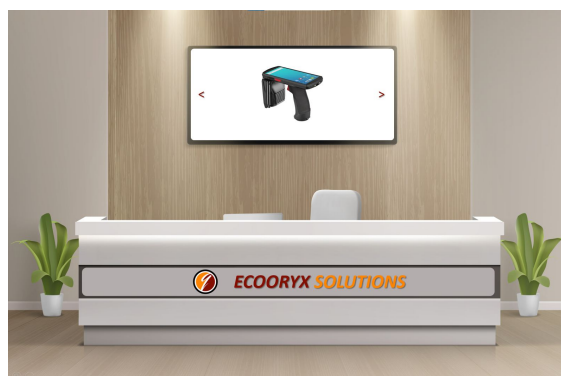

RFID asset tagging & tracking | ICT solutions | Engineering & construction

Who we are

Eco-Oryx Solutions Limited is a Kenyan company that supplies Information and Communication Technology (ICT) solutions and construction services to public and private institutions. We are best known for RFID asset tagging and tracking: we supply the tags and readers, tag assets on site, load them into asset software and train your team.

Founded in 2015 and officially incorporated in 2020, Eco-Oryx was started to bridge the technological and infrastructural gaps in Kenya and beyond. The founders wanted a company that would provide current ICT solutions and also contribute to the construction landscape with sustainable, impactful projects.

After five years of steady growth and successful projects, the company was formally incorporated in 2020. Today we serve ministries, parastatals, banks, hospitals, training institutions and county governments, with offices in Nairobi and Mombasa and project experience in Somalia and Rwanda.

Founded	2015
Incorporated	2020
Head office	Juja City Mall, 2nd Floor, Thika Road, Nairobi
Branch	Tahera Manzil, 2nd Floor, Kenyatta Avenue, Mombasa
Regional work	Somalia, Rwanda
Hardware partners	Zebra, Chainway, Shenzhen RFID, Dell, HP

Vision

To be the trailblazer in providing innovative and value-added technology, engineering and construction solutions to customers worldwide while creating superior shareholder value.

Goals and objectives

- Continue to improve safe work practices with a goal of zero injuries to employees and subcontractors.
- Be the preferred specialty ICT solutions and construction innovations provider in our selected markets.
- Build a portfolio of projects where we add value and maximise returns, in existing and emerging markets.
- Use our integrated project delivery model to give customers a competitive advantage.
- Be the iTech employer of choice and a positive contributor to the communities where we work.

What we do

Smart tagging, queue management, document and records management, ICT and construction – under one roof.

RFID smart tagging & tracking

Tags and readers that let a team count a whole floor of assets in minutes. Site survey, tagging, register cleanup, software and training.

Asset tracking mobility

Rugged Chainway and Zebra handhelds to add, move, check out and log maintenance on assets, online or in batch mode.

Eco-Oryx WebServer

Secure, central asset data in the browser for IT, Finance and Facilities – on-premise or cloud.

Queue management system

Ticket kiosks, QR tickets and counter displays that cut waiting time and report on service performance.

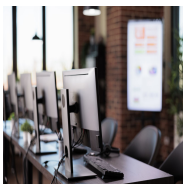

Electronic document management

Scanning, indexing and a permission-controlled repository with versioning and approval workflows.

Records information management

Classification, retention schedules and RFID file tracking for registries and archives.

ICT solutions

System integration, networks, software development, data management and hardware supply.

Engineering & construction

Building technology and civil and structural engineering for agencies, utilities and developers.

How a project runs

1 Talk to us

We learn what you need to track and why.

2 Survey & proposal

We visit, count asset types and surfaces, and send a proposal.

3 Tag & install

Our technicians tag, verify and load every asset.

4 Train & support

Your team runs its first audit with us beside them.

Clients and experience

We have worked with government ministries, parastatals and private institutions across Kenya, and delivered construction work in Somalia and Rwanda.

Selected clients

Ministry of Lands, Ministry of Health, Ministry of Education, Ministry of Defence – Kenya, Kenya Revenue Authority (KRA), KCB, KTD A, MCK, KBC, NCS, KUTRRH, Biovax (MoH), KEMRI, KMTC, NITA, the National Irrigation Board and several county governments.

Selected projects

Project	Client	Area	Year
Construction site works	National Irrigation Board	Construction	2021
Power sub-station civil works	Power sub-station	Construction	2021
Regional infrastructure works	Various	Somalia & Rwanda	
RFID asset tagging, tracking & ICT	Public & private institutions	RFID & ICT	Ongoing

Partners

We supply and support hardware from **Zebra**, **Chainway**, **Shenzhen RFID**, **Invengo**, **Dell** and **HP**.

Leadership and team

“We work where information, technology and construction meet. RFID asset tagging, ICT and construction management – built on innovation, precision and a commitment to excellence.”
